

LASIK SURGEONS AT PCVI

Scott A. Cherne, MD, a graduate of the Loma Linda School of Medicine, has practiced ophthalmology in Eugene, Oregon since 1986. He pioneered the LASIK procedure in Oregon, being the first to perform the procedure in central and southern Oregon. He has performed thousands of LASIK surgeries and currently uses the VISX Star S4 smooth scan laser with ActiveTrak™ 3-D eye Tracker, WaveScan and the third generation Moria microkeratome. The combination of these precise tools and the skill Dr. Cherne possesses allow many of his patients to enjoy clear vision just hours after surgery. In addition to LASIK, Dr. Cherne offers a wide variety of surgical services ranging from cornea transplant, 10-minute no-stitch cataract surgery and advanced glaucoma surgery. He also maintains an extensive lecture schedule. Dr. Cherne and the staff at Pacific ClearVision Institute are dedicated to providing excellence in eye care.

SCOTT CHERNE, MD

John DeGuire, MD. A graduate of the University of Illinois College of Medicine, Dr. DeGuire has been a practicing medical eye care physician since 1992. He brings a wealth of surgical and diagnostic experience to ClearVision. Specializing in LASIK and cataract replacement surgeries he is also skilled in many other types of surgical procedures. Dr. DeGuire also uses the VISX Star S4 smooth scan laser with ActiveTrak™ 3-D eye Tracker, WaveScan and the third generation Moria microkeratome. Dr. DeGuire has lectured extensively and believes strongly in community education regarding eye care. Along with the staff at Pacific ClearVision, Dr.

DeGuire is committed to meeting each individual's personal eye care needs.
